EGON EIERMANN

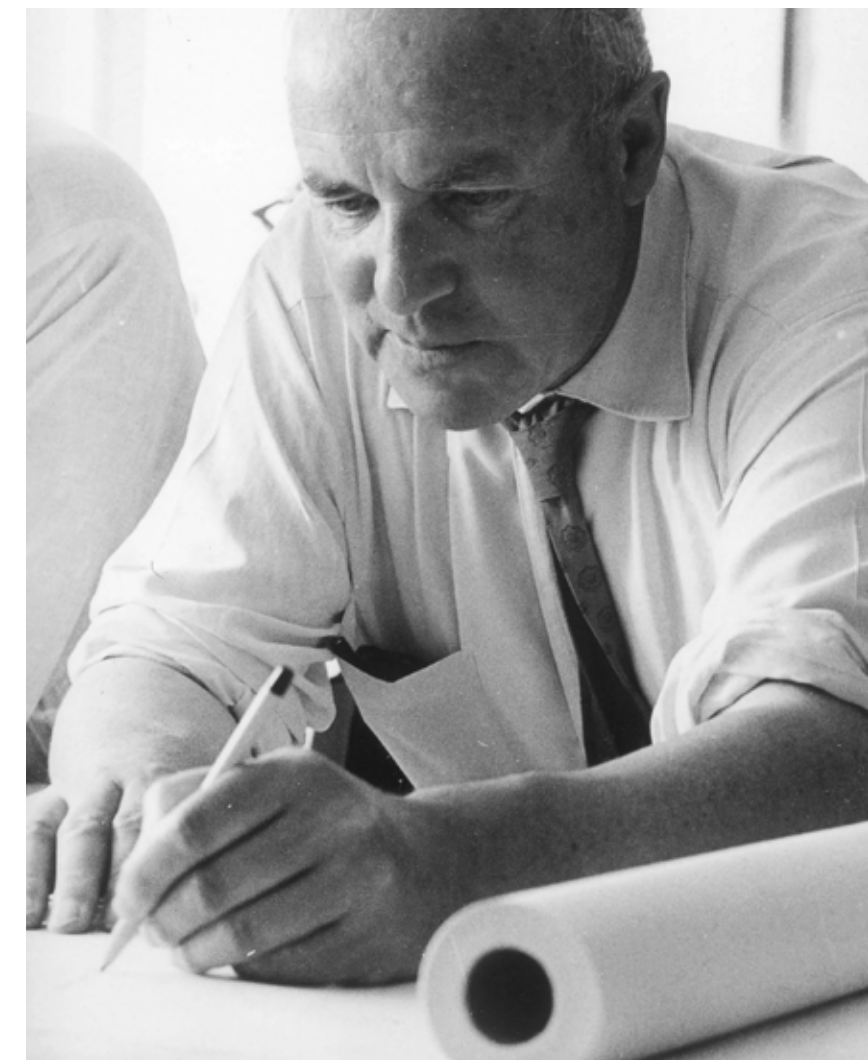

Egon Eiermann is one of the most iconic architects of post-war modernism in Germany. You might never have heard of him, as he has always stood a-long side, but always a little in the shadow of, Mies van der Rohe, Le Corbusier and Charles and Ray Eames. He is famous in Germany for his pure modernistic post war architecture, such as the Kaiser Wilhelm Memorial Church in Berlin and the Olivetti Towers in Frankfurt am Main.

One of the reasons why he never made an international break-through, is said to be his absolute focus on detail and lack of compromise, which led the always immaculately dressed Mr. Eiermann, to exceed budgets.

Today his designs have become popular in Germany, many years after his death in 1970. In an interview to Der Spiegel, Eiermann claimed, that his furniture designs were properly designed, primarily for architects, "The average consumer will never be my friend" he concluded.

PLEASE WAIT to be SEATED + EIERMANN

PLEASE WAIT to be SEATED is a contemporary Danish brand, based on the idea of design traditions, though with a slight twist. We admire the aesthetic designs of Egon Eiermann from first sight, and our company is truly built upon this enthusiasm.

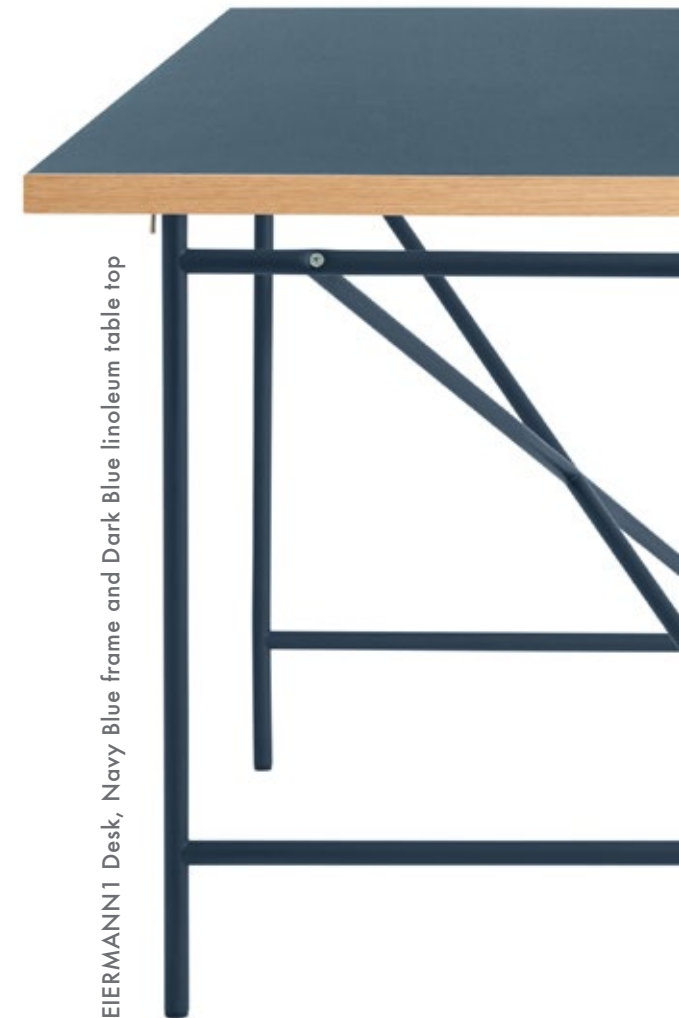

We just had to share our enthusiasm with fellow like minded design followers. Wilde + Spieth and Richard Lampert are the respective, manufactures of the Eiermann chairs and the Eiermann tables. Together with the two manufactures, PLEASE WAIT to be SEATED have spread the word about Egon Eiermanns' classic and iconic designs with great success.

In 1951 Mr. Eiermann designed the chair SE68 for a symphony orchestra in southern Germany. Through-out the past 71 years, the SE68 has been one of the most commonly used orchestra chairs in the world. Most recently in the Elbphilharmonie in Hamburg, designed by Herzog & de Meuron. This must truly indicate that the comfort of the SE68 is extraordinary.

DESK VS. DINING TABLE

When you are to choose your Eiermann1 Desk, Eiermann2 Dining table or Eiermann3 Desk table , there is a few steps you need to go through, in order to get it right for yourself.

DO YOU NEED A DINING TABLE? OR DO YOU NEED A DESK?

They may look similar to you, but they are slightly different. The desk frame is designed for you to sit in the middle of the table and do your thing. The dining tables frames are made for several folks to sit all around. The visual difference is the position of the underneath cross bars. Check and you will see.

CHOOSE SIZE AND FRAME

- Choose the colour of your frame
- Choose your table top size and colour

You are all set.
